-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

HC

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed October 14, 2003 and June 17, 2004 are acknowledged. See enclosed IDS form.

Specification

3. The disclosure is objected to because of the following informalities: "bolts 23" on page 6, line 2, should be --bolts 34--.

Appropriate correction is required.

Claim Objections

4. Claim 2 objected to because of the following informalities: the examiner recommends inserting --said-- before "peripheral direction". Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3616

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 3-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Lang et al. (5,547,213).

Lang et al. discloses an assembly comprising: a gas generator (80) with a flange (84) and a generator holder (30) having a cylindrical peripheral wall (18), said peripheral wall at least partially surrounding the gas generator peripherally (see Figure 4), at least one clamping extension (32- 34a, 34b) being provided in said peripheral wall which is formed by partial lateral deformation of said peripheral wall (see column 6, lines 5-14), characterized in that said clamping extension is delimited by at least one slit (see Figure 4; gap below 32 above wall 18) in the peripheral wall, said slit running substantially in peripheral direction and defining a side of the clamping extension, the side of the clamping extension constituting a stop for the flange (see edge of 34b; Figure 4).

The wall is composed in peripheral direction of alternating wall sections with and without clamping extensions (see Figure 5). The clamping extensions are strip-shaped and have opposite narrow sides (below 32; see Figure 5) which continue to the second wall sections. Regarding claim 6, the portions below tabs 32 are the bridges. The holder has a radial flange (20).

Allowable Subject Matter

7. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3616

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cuevas shows an air bag module of interest. Stephens shows a retainer of interest. Burnard et al. shows an inflator mount.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Dunn whose telephone number is 571-272-6670. The examiner can normally be reached on Mon-Fri, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on 571-272-6669. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
